MDA5 and ASYS

```
BLUF: lineblot is highly prone to FP and FN results. IP is best overall, but
ELISA is a faster, acceptable non-IP alternative.
```

Modality ranked by highest to lower *specificity*:

- IP > ELISA » multiplex bead assays » lineblot

Modality ranked by highest to lower *sensitivity*:

- ELISA >= IP » multiplex bead assays » lineblot

Reliable test options

```
Use OMRF or Labcorp ELISA options. Avoid Quest
```
