

## Inference for Categorical Variables

- One-Sample Inference of Categorical Variables
  - one-sample proportion test
  - $\chi^2$  goodness of fit test
- QI
  - [SQUIRE 2.0 for QI Reporting](#)
  - ☐ Stepped-wedge trial
    - [Link](#)
- Linear regression
  - [Q-Q plot](#)
  - plot of residuals
  - [Cook's Distance](#)
  - these are different!
    - correlative
    - descriptive
    - predictive
    - associative
- confounding vs. effect modification

### to assess a paired difference

- create histogram
- plot as box plot
- make [Q-Q plot](#)
